

U-type BLOWER

Product features

U type blowers are differentiated next generation products smoothly operated in high pressure, even in 1.2 kg/cm²(bar) pressure working condition with excellent durability and simple design which makes clients' various requirement satisfactory by standardizing and simplifying all the parts and components.

- Casing : Only one casing regardless airflow direction
- Side cover : Simple arranging components and parts for eliminating cumulative allowance
- Simple and easy assembly and disassembly
- Other features are same as current models.

Features in design and structure

1. Free airflow direction(horizontal and vertical)
2. Standard component for all models
3. Simple arranging components
